Vo-Ag Teachers Review FFA Hog Show Results

The Lancaster County Vocational Agriculture teachers were told at their regular meeting Tuesday at Solanco High School that this year's FFA hog show had been the best one yet.

Vice president Lewis Ayers, Ephrata, (acting president since the resignation of association president Gene Daugherty) reported that the 197 head entered made it the largest show since the event was started in 1963, and continues the steady increase in show size which has been observed each year

The average weight of 213 pounds was heavy enough to

GUERNSEY FIELD DAY WINNERS. (l. to r.) Harry Mumma, Landisville; Karl Linde, Oxford R1; and Dorothy Breneman, Willow Street R1. The Guernsey Field Day was held Thursday at Mr. and Mrs. B. Frank Eshelman's Chiques Glen Farms, Manheim R1. L. F. Photo

Star Farmer Candidates Named; Winner Will Be Chosen On Tues.

Seven outstanding Future Farmers will be competing for this year's Lancaster County Star Farmer award next week Their names were placed in nomination at Tuesday's county vocational agriculture teachers' meeting at Solanco High School, and the winner will be determined by a judging committee after studying each boy's record and interviewing him. The interviews will be held on Tuesday, August 16, at 7 p m. at Penn Manor High School

Competing will be: William Risser, Warwick; James S. Huber, Solanco. Leon Rutt, Elizabethtown; Robert Weaver, Lampeter-Strasburg, Ken Rohrer, Penn Manor; Daryl Bollinger, Ephrata, and Adam Zimmerman, Garden Spot.

Until two years ago, the highest-rated Keystone Farmer was automatically named County Star Farmer, and the honor carried no award. Beginning in 1964, with Dale Hershey of Manheim being named County Star Farmer, the honor carried a $175 award to cover expenses to the Na-

Ruth Konhaus, First Entrant In NEPPCO Princess Contest

HARRISBURG, PA. — A petite, 19-year-old Penn State senior from Mechanicsburg this week became the first entrant in the annual "Poultry Princess of the Northeast" contest

Ruth Konhaus, a former 4-H Club member whose ambition is to become a teacher of the blind, will vie with girls from 14 other states at the annual Northeastern Poultry Producers Council (NEPPCO) Exposition in the Farm Show Building here, October 4-5-6

The lucky young lady who wins the Poultry Princess title will receive a $500 U S Savings Bond and vast exposure to the public through personal appearances, photographs and agriculture industry publicity during her year-long reign. Runners-up will receive $100 U S. Savings Bonds.

Miss Konhaus, who stands five-feet four-inches tall and weighs 105 lbs., is the daughter of Mr. and Mrs Paul A Konhaus She is a graduate of Cumberland Valley High School and is sponsored by

"Grassroots" Policy Planning By Farm Assn.

A system of policy development enables ideas to move upward from the level of county farms to state, and finally, national levels and become incorporated in the policies and programs of the American Farm Bureau Federation, according to Clyde E. Wivell, chairman of Lancaster County Farmers' Association policy development committee

The committee met recent-

Karl Linde, Top Judge In Contest At County Guernsey Gathering

By Everett Newswanger, Staff Reporter

A twelve-year-old youth won top honors in the type judging contest held Thursday morning at Chiques Glen Farms, Manheim R1, during the annual Lancaster County Guernsey Breeders Association field day

Karl Linde, son of Mr. and Mrs Deiter Linde, Oxford, Pa, took home the model Guernsey cow by scoring 266 8 points out of a possible 300

Following Karl in the youth division was James Myer with 250 1 points; Gilbert Linde, 249 2 points and Jesse Balmer Jr, 233 points.

In the ladies division Dorothy Breneman, Willow Street R1, had the top score of 251 points Mrs Harry Mumma was second with 250 points and third was Louise L. Witmer with 249 points.

Harry Mumma, Landisville, turned in the best cards in the men's division with 266 7 points Second was C. Henry Breneman with 266 6 points and third, Robert Rohrer with 250 1 points

The main feature of the afternoon program was a panel discussion by four local Guernsey breeders The panel members were Frank Hershey, Willaw Street R1; Deiter Linde, Oxford, Melvin Stoltzfus, Ronks R1, and Raymond Witmer, Willow Street R1 After they told about their own farming operations, the 120 Guernsey breeders, their families and friends, gathered on Mr. and

ASCS Annual Tour Schedule Announced

The Lancaster County office of the Agricultural Stabilization and Conservation Service plans to hold its annual farm tour on August 18, according to Miss Dorothy Y. Neel, office manager

Buses will depart from Penn Manor High School, Millersville, at 9 a.m., and will return by 3 30 p m The first stop will be at the Muddy Run Project where a hydro-pumping station and dam are under construction Because of the construction, Miss Neel said, private cars are not permitted at Muddy Run Bus fare for the complete tour is $1 for adults and 25 cents for children

New and remodeled cow barns, diversion terraces, and

County 4-H'ers Win 3 Titles At "State Days"; Ribbon Count Up

Lancaster County 4-H youths emerged from the state competition this week slightly richer in ribbons, but with one less big judging title than they earned last year

The youngsters gathered 22 ribbons, compared to last year's 19 but 13 of these were "blue", representing a gain of six in that top flight circle

The junior livestock judging team, in its first year of competition replacing last year's state champion swine judging team, ranked as number one in the state in its division Team members are Michael Smucker, Ephrata R2, who paced the team by being second high individual in the state Larry High, 346 E Main St, Bareville, tied for fourth Larry Herr, 840 Penn Grant Rd, Lancaster, sixth and Ronald Meck, Reinholds R1, tied for seventh Blue ribbons went to the top three boys on the team

The four, county entries in the demonstration division tallied two state championships and three blue ribbons

In a livestock demonstration, the team of Audrey Yunginger and Kathy Ney, both of Marietta R1, won blue ribbons and first-place state standing Their demonstration was titled "Livestock Need Minerals".

A livestock conservation demonstration by Tom Houser of Lampeter, 'Internal Parasites In Cattle", won him a state title and a blue ribban.

A second place state rating

From Where We Stand . . .

With Liberty, Justice, And POVERTY For All

Administrators of the War on Poverty program recently showed that they really do have a sense of humor — kind of warped, but funny; well, not funny, exactly, but expensive. Sort of "sick" is what it really is!

At least, what else could you call a program that insists on building $156,000 worth of tennis courts in a community whose residents have an average annual income of over $17,000?

According to Pennsylvania Senator Hugh Scott that is what the War on Poverty strategists recently did in suburban Chevy Chase, Maryland.

Scott says the exclusive community had no need for the Job Corps, urban renewal, or slum clearance programs. Apparently the only way the federal government could manage to spend any money there was for tennis courts.

Could the motive of this move be to demonstrate to the "non-poor" that they, too, are Uncle's children and are to share along with the "poor" in all the rich rewards of the Great Society? Or, is it simply a diversionary tactic — get some of the better-off communities to accept the handouts and then they can't complain too loudly over some of the government's wasteful administration of public funds.

Whatever the motive, the result is, as Scott says, ". . . something of a milestone in wasteful use of taxpayers' money".

STATE CHAMPION Junior Livestock Judging Team brought the first title in this division to Lancaster County during State 4-H Days this week. From left they are: Ronald Meck, Reinholds R1; Michael Smucker, Ephrata R2; Larry Herr, 840 Penn Grant Rd., Lancaster; Larry High, 346 E. Main St., Bareville.

● 4-H Days

(Continued from Page 1)

went to Lois Enck, Stevens R1, for her demonstration "The Inside Story of a Horse".

Another second place spot went to James Landis, Lititz R3, who won a blue ribbon in the tractor driving event.

The county's defending champion senior livestock judging team had to accept the runnerup spot in a field of 19 teams, as York County unseated them for the first time in three years. The team included Richard Buckwalter, Lititz R3, who won a blue ribbon and tied for fourth individually; Tom Hess, Leola R1, blue ribbon and seventh place, Donald Miller, Elizabethtown R3, 10th place, red ribbon; and Robert Long, Manheim R4.

Probably the most hotly contested event in the three-day meet was the dairy judging. The Lancaster County team of John Kurtz, 1160 N. Market St, Elizabethtown (the team's only blue ribbon winner), James Kettering, Lititz R3, Paul Brubaker, Lititz R1; and Alfred Wanner Jr. Narvon R2, placed fifth in the state in the 161-contestant event. All four members placed individually in the upper third, with top county scorer John Kurtz tied for 10th place.

The team improved the county's standing this year in dairy judging by moving up from last year's seventh place tie.

Lancaster County placed ninth in a field of 32 teams in horse judging. County placings were Glenn Strickler, 144 N Charlotte St, Manheim, red ribbon and 22nd, Denise Shaub, Drumore R1, white ribbon and 33rd, Ann Hinerdeer, 750 Kayo Ave, Lancaster, white ribbon, 41st. The fourth team member was Kathy Morrison, Quarryville R3.

In entomology judging, the county placed sixth among 10 teams, with Columbia County placing first. Sandra Stehman, Lancaster R6, won a white ribbon for 11th place. Other team members were Peggy Eshleman, Pequea R1; and Linda Porter, Washington Boro R1.

The county vegetable judging team did not place in the top ten of 18 teams entered. Team members were Nancy Nestleroth, Manheim R3, Kenneth Risser, Leola R1. Daniel Rohrer III, Manheim R1, and Patricia Yunginger, Marietta R1.

In flower judging, the Lancaster County team tied for fifth place in the 12 team field. Judy Buckwalter, Lititz R3, won a red ribbon for fourth place. Other team members were Shirley Buckwalter, Lititz R3, and Barbara Hershey, Lititz R2.

Nancy Risser, Leola R1, was a blue ribbon winner in clothing judging. Other county contestants were Daune Palmer, 152 S. Spruce St, Lititz; and Glenda Watts, Gap R1.

Weather

Temperatures for the next five days are expected to average near, or above, the normal range of 85 to 64 degrees. The warmest part of the period will be over the weekend, says the weatherman.

The only rain in sight between now and Wednesday is expected on Monday in the form of scattered showers which may yield ¼-½ inch of precipitation.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

Subtle Killers

Lesson For August 14, 1966

Background Scriptures: Exodus 20 13, Leviticus 19 17, 18, Proverbs 25 21, 22, Matthew 5 21 24, 43, 44 1 John 3 15 18 4 20 21.
Devotional Reading: 1 John 4 19 21.

Two friends of Pogo, the comic-strip swamp 'possum, gleefully announced one day: "We're filled with loathing!" "How come you look so happy then?" Pogo wanted to know. "We're always happy when we're filled with loathing!" they chirped.

Rev. Althouse

Most of us know a few people who seem to be happiest when they are filled with loathing, resentment, or plain ill humor. This, it seems, is the way they like it. Unpleasantness has become for them a way of life.

Sometime ago, while making calls in a local hospital, I saw a middle-aged woman emerge from the "Intensive Care" unit and over-heard her announce to a group of waiting relatives: "Dad's feeling better — he's started to complain!"

Could that be said of you? Are you among those whose pleasant moments are so few that they can individually be remembered by those around you? Are you a walking catalogue of complaints, grudges, and discontentments? Are you sure?

The Sin Within

In the sixth commandment God has declared, "You shall not kill." This commandment often has a comforting effect because most of us know full well we have not broken it nor are we likely to. Jesus, however, did not intend to let us off that easily. According to his understanding of God's purpose, it is not only the murderous act that kills, but also the hateful thought or the vindictive attitude, the deep "inside" currents of feeling and emotion. "But I say to you that every one who is angry with his brother shall be liable to judgment" (Matthew 5:22 RSV).

One doesn't have to cut his neighbor's throat to violate God's purpose for interpersonal relationships. There are many ways of injuring our neighbors, ways that fall short of murder but still bring us into God's judgment. They work slowly but surely to destroy us from within. They are the subtle killers.

When a person indulges himself in hating his neighbor, he hurts himself as well as the person he hates. His resentment becomes an insurmountable barrier between himself and God. Thus, a man coming to worship may find that he cannot truly do so until he has first been reconciled with his neighbor.

Poisonous Grudge

Many medical doctors today believe that bitterness and anger affect the body like destructive poisons. Many sicknesses and afflictions are closely related to unresolved anger and resentment. A woman was diagnosed as having an "incurable" disease. Fervently she prayed to God, asking him to heal her, but her condition got steadily worse.

One day in speaking to a friend it became evident that she was nursing a deep grudge against another person who had wronged her. Encouraged to let God's love heal this bitterness, she let go of the grudge with a deep feeling of relief. As she did an amazing thing happened: her body began getting stronger. In time she was completely healed of her "incurable" disease. Her resentment had contributed the major share of her illness and had shut her off from God's healing power.

"You shall not kill," says the sixth commandment, "Do not hate," says Jesus, further developing the meaning of this commandment. Yet there is more to it than what a person is not supposed to do. There is also something that a person is supposed to do: "Love your enemies, and pray for those who persecute you." There must be something positive to fill the void left by the subtle killers.

And how far does he expect us to go with this forgiving love for enemies? No less far than he went: to the cross, if need be.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service)

CAUTION!!

SLOW MOVING VEHICLE

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Use Tobacco Chemicals Carefully

If chemicals are to be used to control suckers on tobacco, we suggest that growers become familiar with the proper amount and timing of application, this is very important and may vary according to the chemical used. Use only the exact amount suggested; not any more. The stage of maturity of the crop is also to be recognized. Protect the quality of the crop by following recommendations.

To Remove Bluegills

Farm pond owners are urged to permit sufficient fishing from their ponds to keep a good balance between the various fish species. In many cases the bluegills are not reduced enough in population, and they take over the entire pond. If only the black bass are desired for the family table, then only bass should be put into the pond. Over-populated ponds result in small, stunted fish of all species.

To Control Internal Parasites In Cattle

Southeastern Pennsylvania has a very dense cattle population, also, there are many beef cattle imported into the county each year from states to the south of us where parasites are more of a problem. Stomach worms in cattle are more numerous than many producers realize, infested cattle make poor gains and are less profitable. Fecal samples submitted to the local veterinarian will reveal the amount and type of worm infestation present.

MEMBERS of the County Farmers' Association policy development committee met August 4 to discuss plans for the annual policy development program. From left above they are: Leroy Pfautz, Stevens R1; Harold Rohrer, 1623 Book Rd., Lancaster; J. Earl Ranck, Gordonville R1; Harold Ney, Marietta R1; Clyde E. Wivell, Columbia R1; Arthur E. Brown, and Charles H. Craig, both of Nottingham R2.

● Policy Planning

(Continued from Page 1)

ly to discuss plans for conducting its annual policy development (PD) program. Meetings will be held later at various locations in the county to give all Farmers' Assn. members a chance to voice their ideas, Wivell said.

The PD meetings, sponsored by the Pennsylvania Farmers' Association, "gives every member his say," Wivell noted, adding that individual "recommendations are studied and debated with those of all other members throughout America, and finally are reflected in the adopted policies (of AFBF)"

Why we are now selling BIG "H" FEEDS

Service to YOU is the cornerstone of our business. This is our main reason for teaming up with BIG "H"

We recently shook hands on an agreement that is important to you. Honeggers' Big "H" Feeds are now available through us. This is a result of long and careful consideration on our part as to what we believe is best for our customers.

Honeggers' & Co., Inc., with home offices in Fairbury, Ill., is one of mid-America's leading full-line feed manufacturers . . . and no late comer to the feed business. They've formulated quality feeds for 37 years and know and understand this feeding business.

You share in the benefits of advance nutrition technology from an outstanding staff of research and nutrition personnel at the 600 acre Honegger Research Farm at Forrest, Illinois.

Big "H" Feeds stand on their performance records . . . Big "H" Local Logic Proof from farms right in local areas like ours. These factual, dollars-and-cents performance figures help you with your feed buying decisions.

Our decision to go the Big "H" way was made on your behalf. It is one that can benefit you. Our own policy has the same meaning. We pledge to farmers to continue to do our best to serve them.

Come in and ask to see Big "H" Local, Logical facts and figures. Let us show you why our Big "H" Feed decision can mean lower costs of production for you. We welcome your visit.

(Continued from Page 1)

satisfy the buyers, as reflected in the hogs averaging $29.07 per hundredweight; about $2 over the day's average selling price," Ayers said. Another new high was set when the champion brought 71 cents per pound.

Following the association's business meeting, area supervisor T. M. Malin told the teachers of several upcoming FFA activities.

August 26, Malin said, the State Tractor Driving Contest will be held on the John Rodgers farm in Mifflin County. The event, which will begin at 9 a.m., will be open to a maximum of two b ys from each chapter. This will be on a first-come basis with the total entries limited at 40.

The Junior Dairy Show will be held at Hershey, he said, on August 22. It will begin at 1 p m. The FFA boys may bring their animals in on Sunday from 1-3 p m , or until 11 a.m. on Monday.

Malin announced that proficiency winners in different categories have been submitted for the National Proficiency Contest. James W. Musser, Grassland Chapter will be competing nationally in the area of poultry. Also, Malin said, the Grassland Chapter had been entered for a National Chapter Award for having conducted the best FFA programs during the year

Two new Solanco vocational agriculture teachers were introduced to the group They are Jerry L McCarrell and Paul Bahner McCarrell is from Washington, Pa He is a 1965, dairy science graduate from Penn State He will be working primarily with the freshman, sophomore, and junior vo-ag students for one year.

Bahner, married and the father of two children, has taught vocational agriculture for two years in Bucks County. He is a 1956 graduate from Penn State, and received his master's degree in agricultural education in 1962.

The two new teachers will replace William Fredd and Ralph Layman. Fredd will be on sabbatical leave until September 1, 1967. He will be studying at Penn State prior to his return to Solanco. Layman moved from the vo-ag department to the administration at Solanco.

It was further reported that Garden Spot High School had secured undisputed possession for one year of the rotating chapter plaque for the best chapter performance at the FFA hog show. Garden Spot scored 500 points; next nearest competitor was Warwick with 212 points; and Ephrata with 195. This was the first year since the show's start in 1963 that Ephrata has not won the plaque.

Robert Elmer Replaces Daugherty at Grassland

Robert S Elmer will be replacing Gene Daugherty in the vocational agriculture department at Garden Spot High School, according to Robert D Herr, Garden Spot agriculture teacher Elmer will take over his duties as of September 1.

Daugherty, a teacher at Garden Spot for the past five years, and the 1966 president of the county vo-ag teachers association, resigned his teaching post effective August 1 to accept a position with the DeKalb Agricultural Association

Elmer, a graduate of Penn Manor High School and Penn State University, did his practice teaching at Garden Spot in 1965. During the past year he has been teaching agriculture in a York County high school.

● ASCS Tour

(Continued from Page 1)

diverted acreage will be features seen on the Andrew Martin farm at Marticville.

The group will eat a picnic lunch at the Elmer L Huber campsite, Marticville Huber's farm features contour stripping, campsites, and farm pond with boating, fishing and swimming

The final tour stop will be at the John Sangrey farm, Conestoga R2 Sangrey operates a steer farm featuring a self-feeding trench silo. Tourists will also see a drainage ditch and a farm pond.

If bus transportation is desired, reservations should be made with ASCS by August 12, Miss Neel said.

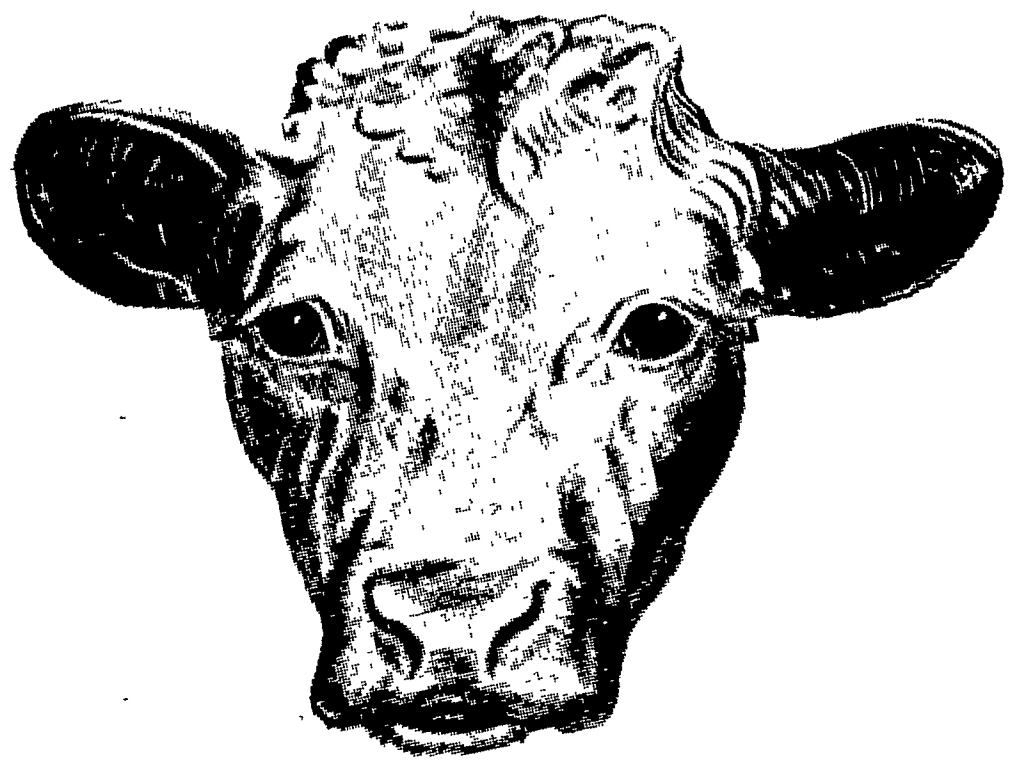
EARN MORE MONEY FROM YOUR STEERS THIS YEAR!



Here is the way you can do it —

Place Red Rose 32 Beef Cattle Supplement or Red Rose 50 Beef Cattle Supplement in your feed troughs! These supplements are concentrated sources of essential ingredients which provide nutrients in proper levels and in correct ratio to overcome grain and roughage deficiencies Combined with your grains and roughages these supplements make **balanced, high-production rations** for your steers. You'll be pleased with the efficiency and economy of your mixes when you use Red Rose Supplements, and you'll be assured quick gains, too.

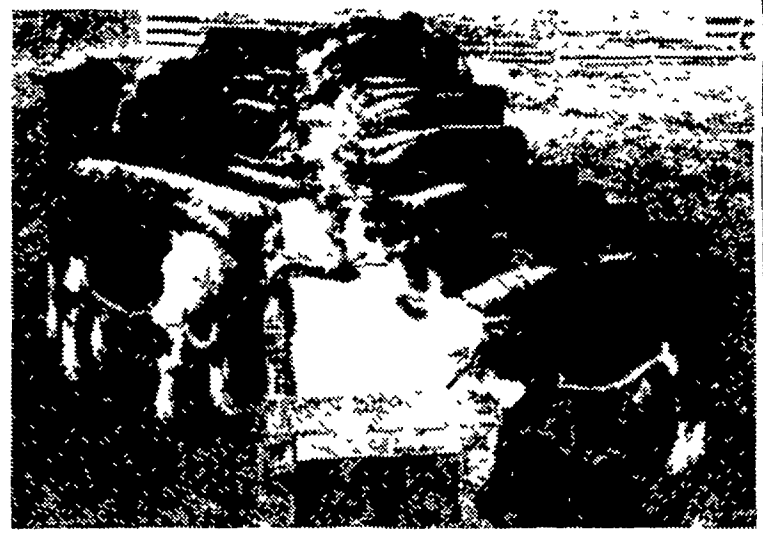
RED ROSE
50 BEEF CATTLE SUPPLEMENT

Use this supplement (meal form) as a mixing supplement or as top feeding on corn and cob chop Feed it at the rate of one pound per head per day.

You'll make high production rations for your steers when you use Red Rose Supplements. Your steers will reach market weights faster — and you'll be pleased with the fine condition of your herd, too. Don't wait — start using these supplements now. See your dealer.

RED ROSE
32 BEEF CATTLE SUPPLEMENT

This is a complete supplement containing urea as a protein extender — fortified with high levels of vitamins A and D, trace minerals, and an adequate level of phosphorus You can use 32 Beef Cattle Supplement as a mixing ration for your home grains, or as a protein supplement to balance the feeding of low protein roughages.



S-O-S

This feed is the answer to burned out or failing pastures due to drought conditions. Eshelman S-O-S (Sack-of-Silage) is a big bag of feed — containing 170 to 180 quarts. It's a succulent, bulky, palatable ration — preferable to citrus or beet pulp. Make S-O-S a part of your feeding program . . . now.

P. Thomas Top Scorer In State Yorkshire Show

Park Thomas, ParKay Farm, Beavertown, topped a field of 47 contestants in the live evaluation contest at the two-day state Yorkshire Show and Sale here last Thursday and Friday, according to tabulations announced Wednesday by John Henkel, vice president of the state association Junior winner was Jeff Paine, Lebanon R4

After being evaluated on the hoof, the eight pairs of littermates were cut out and their meat characteristics determined by actual measurement The top pair was entered by Reno Thomas, Brooks End Farm, Beavertown Second place went to Curtis Roth, Kempton, and third place to Phyllis Paine, Lebanon R4. Carcass evaluation was judged by Dwight Younkin and Lester Burdette, Penn State livestock extension specialists

In the Bred Gilt judging competition Reno Thomas had the champion which later sold for $215 to Steven Martin, Maryland Reserve honors went to Carl Harrison, Bedford, and his Yorkshire gilt was bought by Congdon Bros. of Groton, N Y. for $185

The 45 bred gilts sold for an average of $154 at Friday's Yorkshire Sale at the Guernsey Sales Pavilion

In the Open Gilt class, 12 littermate pairs were shown. The champion pair was entered by Leon Arnold, Lebanon; they were later purchased by Omar Beam, Elverson, for $200 Beam also bought the reserve pair of open gilts shown by Donald Aurand, Lewistown these brought $190

The average sale price for the 12 pairs was $158 40, Henkel said

Twelve boars competed in the show with the championship going to an animal shown by Curtis Roth, Kempton The champ was bought by William Seaman of Pavilion, N.Y for $190

Reserve champion boar shown by Phyllis Paine, was sold to Shisler Farms, Sewell, N J for $145

Henkel, who is also president of the county swine association, said that approximately 250 people had been served at the barbecue put on by the Lancaster swinemen Henkel reminded anyone interested in entering the county swine carcass show, to be held in conjunction with the Lampeter Fair on September 29, to contact association secretary James Z Martin, Christiana R1 in advance of that date.

Evaluation Contest Results— Seniors 1, Park Thomas 2, John Henkel, Willow Glen Farm, Strasburg R1. 3, George E Cogley, Ronks R1, 4, John H. Burkholder, Ephrata R3; 5, Carol Henkel, Willow Glen Farm, Strasburg R1. 6, Melvin Huber, Lititz R1, 7, Robert W Paine, Lebanon R4. 8, Wellington A Hiester, Fleetwood R3, 9, Joe Little, Willow Glen Farm, Strasburg R1; and 10, Leon Arnold, Lebanon.

Junior Division 1, Jeff Paine; 2, Francis S. Arnold, Lebanon R1; 3, Terry Hartman, Kutztown R2, 4, Jeffrey Flinchbaugh, Felton R1; 5, Joel Arnold, Lebanon R1; 6, Edwin G Wessner, Kutztown R2; and 7, Larry Arnold, Lebanon R1.

There were 31 contestants in the senior division and 15 juniors.

Cattle Experts Named To All American Show

HARRISBURG — Seven dairy cattle experts, all members of the Agricultural Extension staff of the Pennsylvania State University, recently were named superintendent and breed representatives on the cattle committee for the third Pennsylvania All-American Dairy Show, Sept. 12-16 in the State Farm Show Building

Harold R. McCulloch, in his third year as manager of the show, said Harvey E. Shaffer will head the committee as general superintendent, a position he has filled also at the first two expositions. Assisting him will be six breed superintendents:

Ayrshire, Lawrence W. Specht; **Brown Swiss,** Robert J. Rugaber; **Guernsey,** Orville A. Yoder; **Holstein,** Donald L. Ace; **Jersey,** Dexter N. Putnam; **Milking Shorthorn,** Stephen B. Spencer. Yoder and Rugaber are county agricultural agents; the others, extension dairy specialists at the University.

Horace L Mann, Farm Show director, who has charge of housing arrangements for the big show, said preparations are being made again to accommodate an overflow of entries in the main exposition hall Plastic sheeting and durable roofing paper will be used to protect the tiled floor and give the animals secure footing

Premium lists have been mailed to all former exhibitors, and show catalogs will be prepared following the August 15 closing date for entries. McCulloch, chairman. Mann, Shaffer and Cuthbert Nairn, Douglassville, comprise the premium and catalog committees.

FARM WOMEN NO. 14 HOLD ANNUAL PICNIC

Farm Women's Society No 14 held its annual family picnic at the Lampeter Community Park on Wednesday, August 10 Seventy-five members and guests attended.

Denise Lantz, 14-year-old ventriloquist from Gap, entertained Hostesses were Mrs. Leon Thomas, Mrs Warren Hershey, Mrs Vincent Hershey, Mrs Ira Rutt, Miss Elsie Metzler, Mrs Roy Book and Mrs Joseph Nolt

The next meeting will be held September 14 at 1 30 p m at the new Penn Dairies building A tour of the plant will be included.

● Star Farmer

(Continued from Page 1)

tional FFA Convention at Kansas City, Missouri, plus countywide recognition Last year's of Ephrata High School winner was Clifford Bollinger

This year, the rules were modified to permit each chapter to submit only one candidate for the coveted county honor Last year, the five candidates came from only three schools

Judges for the contest are William Counts, assistant superintendent of county schools, Stanley Musselman, assistant vice president Lancaster County Farmers National Bank; and Don Timmons, editor, Lancaster Farming

FIRE DEATHS BY AGE

NEW YORK — The highest death rate by fire is among persons 65 years of age and older, according to the Insurance Information Institute

FULTON GRANGE YOUTH COMMITTEE PLANS ACTIVITIES

The Fulton Grange No. 66 youth committee announced its plans for several activities at the bimonthly Grange meeting August 8.

A swimming party will be sponsored August 16 at the home of Mr. and Mrs. Earle O. Gilbert, Sr., near Port Deposit, Maryland. Bus transportation will leave the Grange hall at 6:30 p.m.

The committee also plans a bus trip to Baltimore on August 29 to see the Baltimore-Detroit baseball game. Reservations should be made with one of the following committee members: Clair Murphy, Lois Tindall, Mary Lou Wesley, Mrs James Cochran, Mr. and Mrs. Stanley Stauffer, Jr., or Ruby James.

Another youth committee bus trip is planned for September 10 to Atlantic City. The bus will leave from the Lancaster County Farmers National Bank parking lot in Quarryville at 5:30 a.m. The fare will be $4.50. Those interested are reminded that this is the date of the beauty pageant at Atlantic City.

In addition to the bus trips the Youth Committee is preparing a float for the parade at the Southern Lancaster County Community Fair which will be held September 23.

Election of officers will be held September 12 with nominations submitted at the August 22 meeting.

It was announced that all Grangers and friends are invited to attend the Pomona Grange picnic to be held August 20 at 7 p.m. at the Quarryville Memorial Park.

Letter carriers' uniforms are a 50-50 blend of the Union Blue and Confederate Gray.

If flies are about to drive your cattle crazy,

then you better see us fast for

ORTHO DIBROM Fly Spray

If you're sick and tired of fooling around with weak, half-hearted fly sprays, then you're ready for DIBROM. Minutes after you spray, every fly that's been hit will be dead or dying. When DIBROM hits 'em, they stay hit. Even if they're resistant to other sprays.

DIBROM is registered to spray over and around cattle. In fact, Dibrom in emulsified form is even safe to spray on food crops, up to four days of harvest.

It's easy to use, comes to you ready-mixed and gives you real economy. Sure, it costs a little more than your pyrethrin sprays, but you'll find that it gives a lot better kill. So when all is said and done you wind up getting back a lot more of the money that flies have been costing you in reduced milk and meat production.

Come in and see us . . . we'll be glad to show you how to go after flies like you mean it . . . . . with ORTHO DIBROM.

T. M. Reg. U.S. Pat. Off.: Ortho, Dibrom. On all Chemicals, Read Directions and Cautions Before Use.

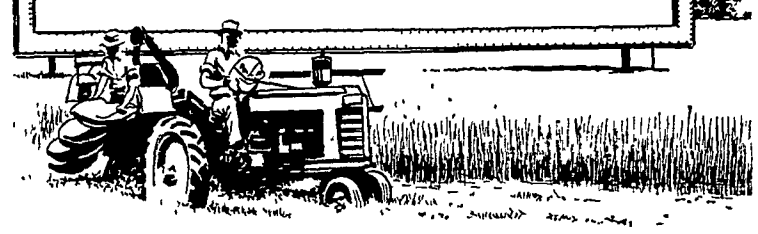
For The Man Who Wants BIGGER YIELDS

Hoffman FARM SEEDS



Settling for average grain yields is like putting an automatic half-hitch on crop profits.

Look at Pennsylvania's record for 1965. The average wheat yield was a record 34 bu. per acre, but good management and today's good varieties can produce 45 to 50 bu. Barley averaged 48 bu. per acre (also a record high) but some farmers are now growing 75 to 80 bu. on good soils. Oats averaged 46 bu. Good growers are harvesting 70 to 75 bu.

Ohio studies show that when wheat yields rise from 30 to 45 bu. per acre, cost per bushel drops about 24 cents simply because total crop expenses do not increase in the same proportion as yields.

Yes, there's plenty of room for yield improvement that can come from Hoffman proven varieties. Hoffman quality seed . . . plus good farm practices. Set your sights on grain yields that are considerably above average!

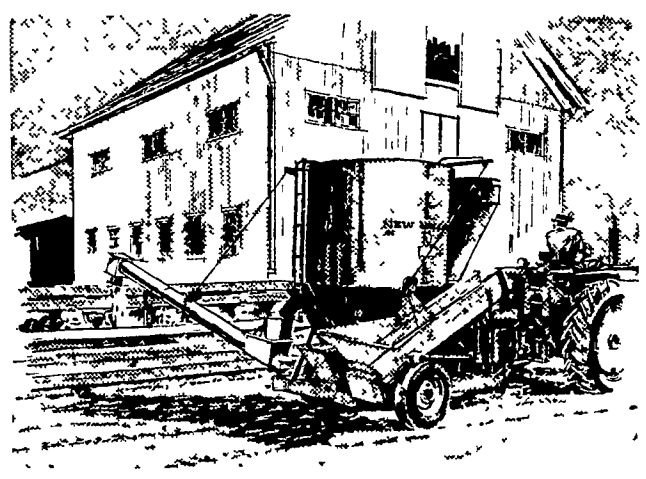
A New Holland on-farm feed factory grinds and mixes where and when you want!



Nothing beats the day-to-day convenience of do-it-yourself grinding and mixing. And nothing beats a New Holland Grinder-Mixer for doing the job right! Extra grinding screen on top of hammermill increases total grinding surface to 760 square inches—for faster, more uniform grinding of ear corn, shelled corn, small grains and roughages. Vertical auger makes sure concentrates are always evenly distributed in mixing tank. Stop in today for all the details. Terms to fit your budget.

4-H CLUB NEWS

WILDLIFE CLUB TOURS POTTER COUNTY AREA

by Annette Long, reporter

The Lancaster County 4-H Wildlife Club took its annual trip to Potter County, August 5, 6, and 7. The members stayed in a hunting camp near Cross Fork to which club leader Raymond Stoner belongs.

Activities included hiking in the mountains, swimming at a State Park recreational area, spotting deer at night, watching Preston Croyle call deer to his feeding grounds, observing an oil drilling crew at work, and a tour of the Consolidated Gas Supply Corporation Compressor Station at Tamarack.

The next meeting will be a tour of the Peach Bottom Atomic Power Plant.

LITITZ-MANHEIM CLUB PLANS ROUNDUP

by Carol Rohrer, reporter

The Lititz-Manheim 4-H Sewing Club will hold a tea for their mothers followed by games and a short program. Judges for the roundup will be Mrs. John Nissley, Mrs. Henry Reist, and Mrs. Joseph Breneisen.

The roundup program committee includes Pam Becker, Diane Palmer, Wendy Fritz, and Debbie Wenger.

Anna Ruth Long and Carolyn Snader will head the game committee.

Food committee will consist of Carol Rohrer, Shirley Buckwalter, Heidi Fritz, and Carla Ritchey.

Club president Judy Buckwalter will be mistress of ceremonies for the fashion show and program.

Drought Cancels Corn Field Day

HARRISBURG — Cancellation of this year's statewide corn field days program emphasizes the severe hardships that drought is causing Pennsylvania farmers, State Agriculture Secretary Leland H. Bull said Tuesday.

The corn demonstration program — scheduled to have been held at the Harvey P. Sunday farm at New Kingston, Cumberland County, September 28 and 29 — was called off last week after the planning committee viewed drought damage in fields there

"The corn was stunted, fields were spotty with large bare spaces, and there wasn't much point in going on with plans for the program," Bull said

"The real tragedy, however, is that condrtions on the Sunday farm are typical of what is happening in many parts of Pennsylvania this year," he added "Take a drive almost anywhere and you can see the damage caused by this dry, hot weather" (Less than two inches of rain fell in Central Pennsylvania in three months —May, June and July)

"In the hardest hit areas I have seen corn, scarcely knee high, in tassel Fields are ragged looking, with many bare spots. Leaves are curled and beginning to dry Corn such as this will never ear out It is too late

'These fields are total losses, with not enough growth even for ensilage Some farmers already are disking poor fields, hoping conditions will improve in time for fall planting"

Secretary Bull pointed out that these are extreme conditions observed in the driest parts of Pennsylvania

"In some sections," he said, "corn fields were helped by sporadic storms and look fairly good Color is a good, dark green Growth is even and tasseling and ear development appear about normal But stalks are short and, if cut for ensilage, will yield less than average amounts"

Concerning low butterfat test, Victor said the trouble may be too much short feed and green chop and not enough roughage. "Not enough roughage could reduce the butterfat test," he said. "Encourage your cows to eat more hay. That's the first thing to do."

Other featured persons on the program were Miss Carol Hess, Lancaster County Dairy Princess; Raymond Witmer National Director of the American Guernsey Cattle Club and John Blyholder, fieldman for the Pennsylvania Guernsey Breeders Association.

Lewis Ayers, Ephrata High School vocational agriculture teacher, served as judge.

● Guernsey Day

(Continued from Page 1)

Mrs B Frank Eshelman's green, shady lawn to ask the four-member panel such questions as

Q How long do you let calves drink from the cow after they are born?

A (1) take away the first day (2) a week to two weeks (3) not at all and (4) 3 days

Q How much grain in ratio to milk do you feed?

A (1) depends on ruffage quality (2) As long as they are in the milking parlor (3) all the grain they can eat when fresh (4) ratio is 14 or 5

In answer to the question of how you go about pushing the fresh cow the panel made such statements as "I don't push grain' and 'I feed more roughage"

The discussion was really cut short A cloudburst sent everyone scampering for cover to adjourn the meeting in a huff

Victor Plastow Lancaster County associate agricultural agent told the group that Sudan Grass or Sorghum are about the only crops to plant now if you need more roughage "If we don't get moisture there is still a big question mark if it will grow" Also if you do get a crop and you want to green chop it, "don't cut it before it gets 30 inches high" Plastow warned.

● NEPPCO

the D. E. Horn Company of York.

Poultry Princess candidates are judged on the basis of beauty, charm, personality and poise. They must be single and between the ages of 17 and 23 but need not have any previous association with the poultry industry.

The search for additional sponsors and entrants from the 14-state NEPPCO-land area continues from the Council's headquarters at 10 Rutgers Place, Trenton, N.J. Girls without sponsors will be assigned them after applications are received.

The contestants will be judged in evening gowns and bathing suits at the annual NEPPCO Banquet on Wednesday, October 5, in the ballroom of Harrisburg's Penn Harris Hotel. The winning "Princess" will receive her crown, velvet robe and title amid all the splendor and excitement of a junior Miss America pageant.

SECOND SECTION

Don't Cut Drought-Damaged Corn, Agronomist Advises Farmers

If you are tempted to cut drought-stunted corn right now, don't do it.

This is the suggestion of University of Maryland forage specialist, Dr. Wally Moline. He says corn crops have been hurt, but there is very little to gain by making silage now.

"Chances are," he says, "That rains will come, and even if grain does not form, most of the feed value will be in the fodder."

With much of the area corn crop damaged by dry weather, Moline says, farmers may see some corn turn a little purplish because of the high sugar content of leaves and stalks. If the corn is left to grow it will continue to pile up dry matter (feed value) as long as the corn stays green. This is valuable feed that you can put in the silo late in the fall.

Moline believes it might even pay to buy drought-damaged corn fields from neighbors if a farmer thinks his feed supply will be low this winter.

But, don't cut it now, he advises. The stunted corn is not worth much for silage now, but it could still make a great deal of growth before frost.

As a further note of caution, he adds that when corn that has been fertilized with nitrogen is damaged by drought and then put in the silo, oxides of nitrogen often escape. These brownish-yellow gasses are extremely poisonous to man and animals. AVOID BREATHING THE GASSES. Do not go into the silo unless the silo filler blower has been running for 15 minutes or so.

The situation usually clears up in about 10 days or two weeks after the silage has been put into the silo. After that it is safe to feed the silage in a normal manner, Moline stated.

Scouts' Conservation Interest Booms

As far as soil and water conservation is concerned, the Boy Scouts of America are living up to their motto, "Be Prepared."

This is indicated by the substantial increase in the number of Soil and Water Conservation Merit Badges awarded to Pennsylvania Boy Scouts and Explorer Scouts. The Merit Badge boom was pointed out by Ivan McKeever, state head of the U.S. Soil Conservation Service located at Harrisburg.

The number of conservation Merit Badges granted to Scouts across the country has more than doubled over the past five years. In 1961, 27,372 boys earned the Conservation Badge. That figure has climbed to 58,455 badges awarded in 1965.

According to Charles Griffin, Assistant Director of Rural Relationships for the Boy Scouts of America, part of the reason for the substantial in-

(Continued on Page 18)

Darvin Boyd To Work In Korea For One Year

Darvin Boyd, Ephrata R1, and his bride of two months, the former Linda Jean Stehman, will be winging their way toward Korea this week with a three-day stopover in the Hawaiian Islands.

This will be a return visit for Boyd who spent five months in Korea under the International Farm Youth Exchange (IFYE) program in 1964. His tour of duty this time will be for one year, and he will be working with the American-Korean Foundation as an agricultural field representative.

His job will be similar to

(Continued on Page 19)

9 REASONS
why you're ahead

McCORMICK INTERNATIONAL® 16 FIELD HARVESTER

1 You get big, 40-ton per hour capacity, yet the 16 is priced with the lowest on the market!

2 You get maximum strength with minimum weight through brand new design.

3 The lightweight 16 rides on top of soft ground where heavier units bog down.

4 You can green-chop with 2-3-plow power and switch to bigger power for fast silo filling.

5 9-knife cutter head cuts shorter than ¼-inch. Fine cut feed takes up less space in the wagon and silo . . . cattle clean up after every feeding.

6 You can green-chop daily feedlot ration in the morning, and . . . in less than 7 minutes . . . switch units to cut corn silage.

7 You get longer life from the built-in quality. Just one example is the long-life roller chain. Not one V-belt or a single link of stamped steel chain is used on the 16!

8 You're ready to go sooner with the 16. Sharpen knives right on the machine . . . grease fast . . . only 8 fittings with corn unit attachment.

9 You get versatility and safety. For example, you can raise the entire chopper to high axle position . . . then tilt harvesting unit forward to avoid picking up rocks. Raise and lowers harvesting units without changing delivery spout angle.

Available with corn head, cutter bar or windrow pick-up units.
Come in. See the 16 chopper!

Add A Dash of Lemon For A Lively Flavor

Add the zippy flavor of lemon to many foods and see how it enhances their flavor. We think of lemon and seafood together but it can be used just as well with many other meats such as chicken and steaks.

CRUSTY LEMON-PARMESAN BAKED CHICKEN

- 1 broiler-fryer, 1½ to 2½ pounds, cut in half
- 1 teaspoon grated lemon peel
- ¼ cup fresh lemon juice
- 2 tablespoons water
- 1 tablespoon salad oil
- 1 teaspoon oregano leaves, crushed
- 1 teaspoon garlic salt
- ½ teaspoon salt
- ⅛ teaspoon pepper
- 1 teaspoon Worcestershire sauce
- ¼ cup grated Parmesan cheese

Dry chicken halves and place cavity side up in shallow glass dish. Combine rest of ingredients, except Parmesan cheese; pour over chicken. Marinate at room temperature, turning once. Line a shallow baking pan with aluminum foil. Place drained chicken halves, cavity side up in pan; pour over half the marinade and sprinkle with half the Parmesan cheese. Bake, uncovered, at 400 degrees for 30 minutes Turn chicken; pour over remaining marinade and sprinkle with remaining cheese Bake an additional 30 minutes, or until well browned and tender. 2 servings

SCALLOPS SAUTE WITH LEMON

- 1 pound scallops, fresh or frozen
- 1 egg, well beaten
- ½ teaspoon salt
- 3 tablespoons sesame seeds
- ½ cup minced parsley
- 1 tablespoon grated lemon peel
- 2 tablespoons lemon juice

Lemon wedges

Rinse scallops thoroughly in cold running water; drain and pat dry with paper towels. Saute bacon in frying pan; drain and reserve drippings. Combine beaten egg and salt. Dip scallops into eggs, then roll in sesame seeds, Fry scallops in bacon fat, about 5 to 7 minutes just until tender, turning frequently to brown evenly. Add parsley, lemon juice and peel; toss lightly and cook for 2 minutes. Serve hot with lemon wedges. Makes 3 to 4 servings.

* * * *

LEMON BARBECUED ECONOMY STEAK

- 1 chuck steak, cut 1½ inches thick (about 4 to 4½ lbs.)
- 1 teaspoon grated lemon peel
- ⅔ cup lemon juice
- ⅓ cup salad oil
- 2 teaspoons monosodium glutamate
- 1½ teaspoons salt
- ⅛ teaspoon coarse grind pepper
- 1 teaspoon prepared mustard
- 1 teaspoon Worcestershire sauce
- 2 green onion tops, cut into 3-inch pieces

Wipe steak with paper towel; score fat around edges. Place in a shallow glass dish Combine remaining ingredients and pour over steak Marinate for 3 hours at room temperature or 6 hours in the refrigerator, ready to cook, remove steak from marinade and wipe partially dry. Place on grill about 3 inches from hot coals or over high heat on indoor barbecue. Cook about 12 minutes on each side for rare, or about 15 minutes on each side for medium doneness. To serve, cut meat across grain in thin slices. Meat should be charred on outside and red or pink and juicy inside. 4 to 6 servings.

* * * *

HIGH COUNTRY FRIED TROUT

- 8 trout, fresh or frozen (4 to 6 ounces each)
- ¼ cup lemon juice
- 6 slices bacon
- ¾ cup dry bread crumbs
- 2 tablespoons grated lemon peel
- 1½ teaspoons salt
- ⅛ teaspoon pepper
- ¼ cup chopped green onion tops
- 2 tablespoons chopped pimiento

Wash and dry trout, (thaw if frozen); dip in lemon juice and let stand 10 minutes. Saute bacon until crisp; drain and reserve drippings. Combine bread crumbs, lemon peel, salt and pepper. Roll trout in seasoned bread crumbs and fry in bacon drippings just until brown and crisp and fish flakes easily with fork, turning once. Crumble bacon and combine with chopped green onion and pimiento. Arrange trout on serving platter, sprinkle with bacon mixture and garnish with lemon quarters. 4 servings.

* * * *

LEMON LELANI BAKED CHICKEN

- 1 broiler-fryer (2½ to 3 lbs.) cut into serving pieces

Salt and pepper

- 2 to 3 tablespoons salad oil
- 1 medium onion, chopped
- ½ cup chopped celery
- 1 (8½ ounce) can crushed pineapple, well drained

For The Farm Wife

(Continued from Page 14)

1 teaspoon grated lemon peel
⅓ cup lemon juice
⅓ cup hickory flavored catsup
2 tablespoons brown sugar
1 tablespoon prepared mustard
2 teaspoons soy sauce
½ teaspoon salt

Season chicken with salt and pepper. In hot salad oil saute chicken on all sides until golden brown; transfer to shallow baking dish. Add onion and celery to chicken drippings, adding additional oil, if necessary. Saute vegetables until soft, but not brown. Thoroughly combine remaining ingredients; add to vegetables and bring to a boil. Pour hot sauce over chicken. Bake, uncovered, at 350 degrees 50 to 60 minutes, or until tender. 3 to 4 servings.

* * * *

SARDINE BOATS

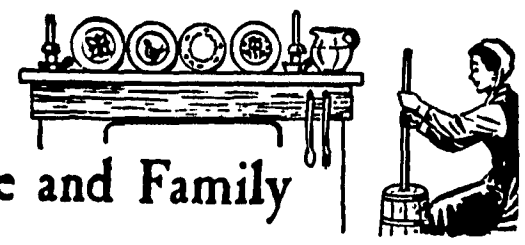
6 slices fresh bread
3 hard-cooked eggs
2 cans (3¾ ounces each) skinless, boneless sardines, drained
½ cup chopped cucumber
½ cup mayonnaise
2 teaspoons grated lemon peel
2 tablespoons lemon juice
1 teaspoon prepared mustard
Dash cayenne pepper
Dash Worcestershire sauce
Tomato slices
Lemon quarters

Trim crusts from bread and fit slices into muffin tins. Bake at 400 degrees about 8 minutes, until golden brown. Chop eggs, reserving one whole yolk for garnish. Drain sardines and flake with a fork. Add remaining ingredients except reserved egg yolk, tomato slices and lemon quarters. Toss sardine mixture lightly and spoon into "toast boats". Top each serving with tomato slice. Press yolk through sieve and sprinkle over tomato. Serve with lemon quarters. 6 servings.

PLAN FOR EMERGENCY

Take time to discuss emergency planning as a family, suggests Edward B. Vansant Jr., rural civil defense coordinator of The Pennsylvania State University. One way to get everybody thinking is to identify all possible emergencies the family could be exposed to. This will get the discussion off to a good start. In most cases you can prepare for all possible emergencies as easily as for one.

Shortly after a young lady became a full-fledged nurse, she saw a man lying prone in the street and was shocked that passersby callously paid no attention to him. So she rushed up and began giving him artificial respiration. The man raised his head and said, "Lady, I don't know what you're trying to do, but I'm trying to get a wire down this manhole."



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

For Success In Canning

THOMAS

Can only good quality fresh fruits and vegetables

Use proper containers and equipment in good working order

Wash foods and utensils thoroughly.

Use the recommended canning method for each food.

Follow an up-to-date canning timetable

Work fast. Prepare only the amount of food you can process at one time.

Cool properly.

Check seals.

Store in a clean, cool, dark, dry place.

Use within one year.

Use Credit Wisely

When you use credit, remember:

Make as large a downpayment as possible. Your payments will be less.

Pay the balance as quickly as you can. You will save money.

Your credit rating is valuable. Protect it Use credit only for things you really want and need.

Make sure advantages outweigh the disadvantages

Learn about the different kinds of credit

Shop for credit . . . get it at the lowest possible cost.

Decide the best kind for your purpose.

Understand the terms of any contract you sign.

Understanding Children

Each child grows in his own way and at his own speed.

Each child needs encouragement. This helps him to be a special person.

No two children are alike. Each one does things his own way.

Each child needs to feel good about himself He needs to feel he is a capable person.

A child needs to see and do and feel new things. This helps him discover the world around him

It is good for a child to ask questions. He needs good answers that he can understand.

A child needs to be encouraged to tell what he saw or did.

New John Deere 237 Corn Picker

raises the speed limit in high-yield corn

Shift up! Pick at speeds up to 5 mph, even when yields run well over 100 bushels. Long, tapered gatherers and high inside shield, funnel stalks right in. Even tangled stalks seldom escape three roller-type gathering chains. There's new gathering and snapping speed. And the 237's spiral snapping rolls cut shelling loss in half.

Faster elevators with higher flights move corn up fast. Trash goes too, aided by new rotating trash paddles. New husking rolls—cast-iron spirals against serrated rubber—peel husks, pull trash through. You pick clean. See the new 237 soon. Ask about the Credit Plan.

Data Processing May Probe Trading Methods

The U. S. Department of Agriculture announced recently a special study is underway to determine if automatic data processing techniques can be used effectively in investigations of trading practices on commodity exchanges.

These investigations, which involve painstaking analysis of the pattern of individual buying and selling transactions in commodity futures over periods of several days or weeks, are conducted as part of the regulatory duties of the Commodity Exchange Authority.

The use of automatic data processing will be studied as a way to increase the number of trade investigations and to cover more commodities than current techniques will allow.

CEA has made a limited number of trade practice investigations in the past to seek out abusive practices in the trading of commodity futures. Most recently an investigation of job-lot trading in grain futures on the Chicago Board of Trade showed that customers were not receiving as good a price as they should.

As stocks of farm commodities have been reduced in recent years through new farm programs and more intensive efforts to develop overseas markets, the volume of futures trading has increased significantly, the USDA reported This stepped up activity calls for greater vigilance to protect the public interest

During the study, CEA will consult with exchanges, clearing houses and members and other organizations and persons to determine how more efficient techniques can be developed to protect the public interest as the Commodity Exchange Act requires while not restricting the healthy and constructive development of market services.

Charolais Exports Up 91 Percent Last Year

HOUSTON — Exports of Charolais breeding cattle from the United States during 1965 increased 91 percent above exports a year earlier, accounting for much of the overall increase of exports of all breeds from this country last year.

J. Scott Henderson, executive secretary of the American-International Charolais Association, the recording agency for the fast-growing French cattle on this continent, said the increased Charolais exports have accompanied the phenomenal increase in demands by breeders and ranchers in this country for growthy, efficient beef producing animals.

American Charolais breeders exported 1,949 head — 544 bulls and 1,405 females — to 16 foreign countries compared to 1,020 animals a year earlier. Canada was the largest importer of the American-produced Charolais, taking 58 percent or 1,142 head Charolais represented 39 percent of all beef breeding animals exported to Canada during 1965

Mexico was the second largest country in Charolais imports, buying 572 head, two-thirds of which were bulls for use in commercial ranching programs Other countries receiving significant shipments of Charolais included Nicaragua, Guatemala, Guam, Honduras and the Philippine Islands

Overall exports of beef breeding animals from this country during the past year increased 19 percent above year earlier totals, Henderson said.

U.S. Wheat Storage Lowest Since 1952; Pa. Stocks Double 1965

The nation's wheat supply on July 1 was reported at the lowest point since 1952, and one-third less than on July 1 of last year.

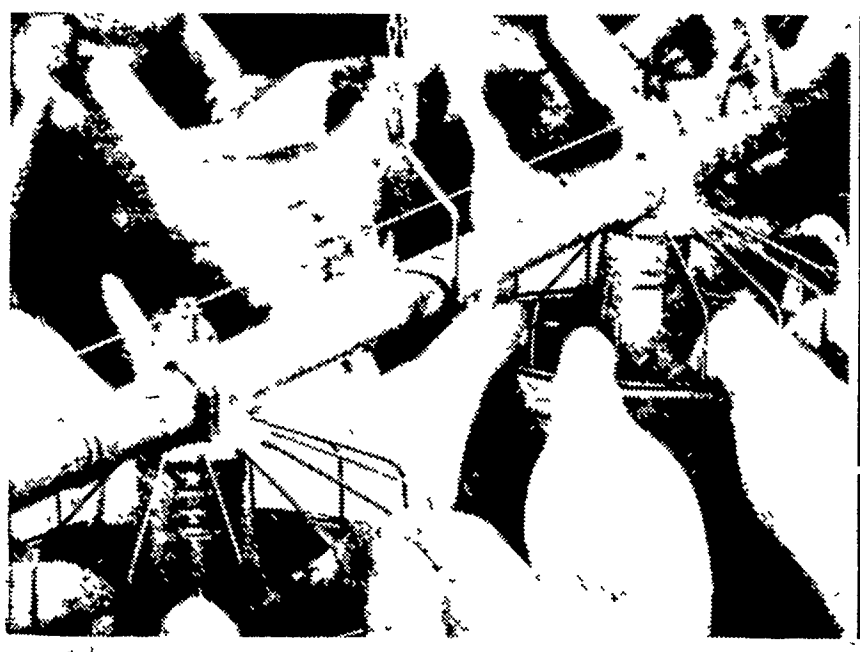
In contrast, stocks of wheat stored in Pennsylvania, July 1 totaled 47 million bushels, nearly double the amount in storage a year earlier.

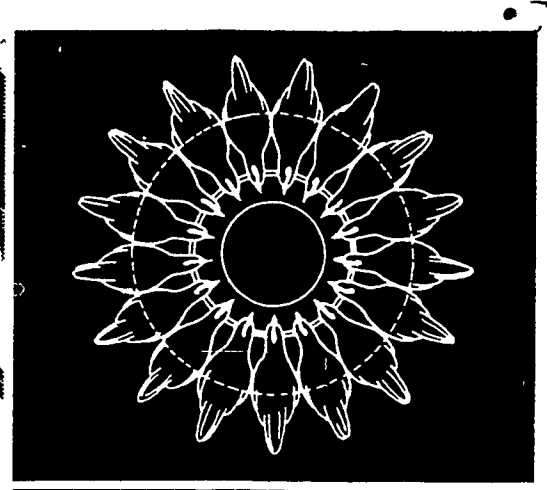
Corn in storage nationally was also down from a year earlier, totaling 1,814 million bushels This was 26 percent below average.

Again, in Pennsylvania the corn storage rate was up, 22 percent more than a year earlier.

Stocks of all grains stored in Pennsylvania totaled 28.7 million bushels, 20 percent more than on July 1, 1965.

chore-matic is #1





anderson

There are plenty of good reasons why Chore-Matic is America's top poultry feeding system (ask your neighbor, he probably has one). Any place in the house every bird has a complete, fresh, clean feed ration that's not picked over. Waste and contamination are virtually eliminated. Chore-Matic gives 30% more feeding space over trough type feeders. Entire line raises and lowers *easily* for fast floor cleaning. Auger gently moves feed to pans, doesn't grind or separate feed. And the versatile Chore-Matic system provides completely automated feeding for any size poultry house. Sure it's number one. Always has been, always will be. But then it should. Chore-Matic is the original auger type feeding system.

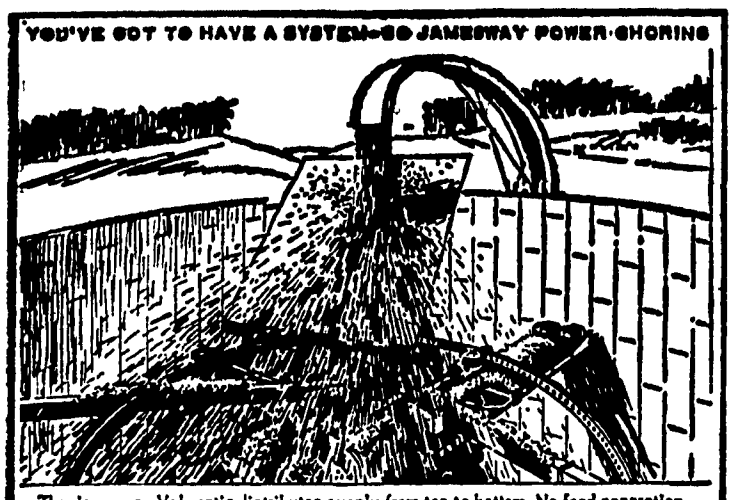
197 GREENFIELD ROAD
P. O. Box 1233, Lancaster, Pennsylvania
Phone 717-394-9204



The Jamesway Volumatic distributes evenly from top to bottom. No feed separation.

BIG J DISTRIBUTOR/UNLOADER
distributes feed uniformly— gives you 20% more capacity

Two machines in one! The Big J works in any season — as a silage distributor, as a silo-unloader. At filling time, the Fill-O-Matic distributor revolves to direct feed to the wall of the silo — cob, corn, stalk, grass and leaf particles stay mixed evenly for ideal compaction, fermentation and preservation. No uneven, off-center loading which causes dangerous pressures against silo wall. Ends hand labor in the silo because the Big J is completely mechanical!

Positive delivery unloader! The Big J unloads evenly, too, with Power Circle Drive and 3-Point Suspension. You can remove fluffy, newly cut haylage immediately — no waiting for feed to settle.

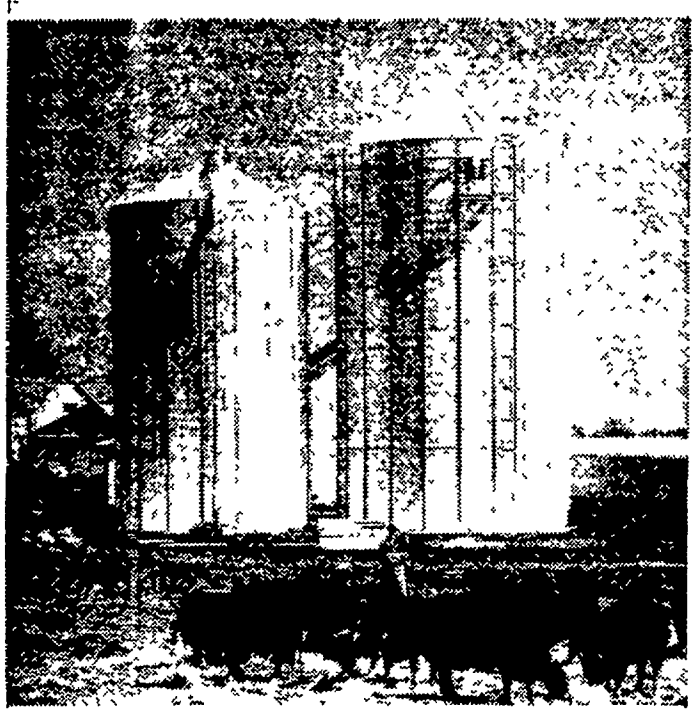
Reduce Crop Losses!



Feeders, Dairymen! Sealed Storage Can Help You Do It!

Don't let hot, dry weather cut you completely out of your corn crop profits! An investment in Butler sealed storage can save the day!

If you normally expect a yield of 100 bushels per acre—and dry weather cuts this yield in half—your 50-bushel crop, cut as silage and stored in a Butler Stor-N-Feed unit, will produce as many pounds of beef or pounds of milk as your 100-bushel yield, when harvested as grain. It also will pay you to investigate late forage crops such as sudan hybrids. Put up as low moisture silage, the nutrient yield per acre is very attractive.

See us today for details on a proven Butler Stor-N-Feed system... big capacities, fast discharge rate, mechanically reliable—and priced thousands of dollars less than some systems. Low-cost "Pay-As-You-Grow" financing readily available!

Portable Pesticide Detection Lab. To Be Developed

A portable laboratory for rapidly detecting possible pesticide residues on food and animal feed before they enter marketing channels will be developed by F & M Scientific Division, Hewlett-Packard Corporation, Avondale, Pa., under a two-year $31,630 contract awarded by the U. S. Department of Agriculture.

USDA's Agricultural Research Service will supervise these studies on a rapid detection system. Portable equipment and faster techniques may permit commodities to be tested without lengthy laboratory analysis. Such a system would be useful to USDA commodity inspectors as well as other government agencies and food industries.

The contractor will develop a sample analysis system containing (1) battery-operated electronic instruments, (2) a portable gas chromatograph, (3) inexpensive and disposable supplies for preparing samples, (4) an operation manual for immediate application of the new system in market channels, and (5) a rugged cart to carry the portable laboratory across rough terrain without adversely affecting test equipment.

Initial tests will be made with milk, wheat, fresh tomatoes, and apples. These products are representative of a larger number of commodities that could be tested with the portable system. A report on the development and testing of the portable pesticide residue analysis laboratory will be made at the completion of the contract, USDA said.

Scouts Conservation

(Continued from Page 13)

crease is the new requirement that the badge be attained by all Scouts seeking Eagle rank.

McKeever stated, "The Soil Conservation Service will continue to encourage and counsel Scouts of Pennsylvania toward conservation achievement. This rise in Conservation Merit Badges is, indeed, reward enough for the efforts of our past programs with these boys. They are now more acutely aware of the necessity of protecting wildlife, soil, water and woodland."

It has been estimated that good quality alfalfa hay is worth 40 percent more per ton than grass hay as a feed for beef cattle.

Now, 10% More Milk

Dairymen everywhere are talking about Ful-O-Pep Cattle-izer Dairy Feed—the biggest breakthrough in dairy cattle nutrition in this century. In herd after herd, the story is the same: *more milk on the same amount of feed.*

Based on an entirely new principle in ruminant nutrition, Ful-O-Pep Cattle-izer Dairy produces up to 20% more usable energy than regular Super Milking Feed. And records show this extra energy results in an average of 10% more milk after only 4 weeks on feed.

What would 10% more milk mean for your profits?

extension work, and part of his time will be spent train-

Darvin Boyd

ing boys and girls at the leadership farm there. In addition to the nine provinces and two major cities in Korea.

Mrs. Boyd, a graduate of Elizabethtown College and a former elementary school teacher, hopes to teach in Korea during the time her husband is employed there.

Following his last Korean visit, Boyd delivered talks to many county groups. The money he received for these talks, some $600, was invested in a 4-H hog-bank-program for Korea, similar to the Sear's chain gilt plan enjoyed by Lancaster County Future Farmers of America.

Boyd combines the qualities of a good farm background and education and training at the college level. He graduated from Delaware Valley College of Science and Agriculture in 1964, and later earned his master's degree in public administration. Added to these qualifications are a deep interest in the Korean people.

Double Premium Offered For All American Show

HARRISBURG — Double premiums in the state or provincial herd class were announced this week by the Pennsylvania All-American Dairy Show for all breeds that make the All-American their official national show.

Harold R. McCulloch, manager, said first place in that class for national breed shows within the All-American will carry a premium of $200, highest single cash prize in the entire show. The second place premium will be $150, and $100 each for all other entries.

First to benefit from the premium boost will be Ayrshires whose breeders will be holding their 1966 national show during the third Pennsylvania All-American, Sept. 12-16 in the State Farm Show Building.

Cuthbert Nairn, Douglassville, general chairman of the show and president of the Pennsylvania Dairy and Allied Industries Association, said the higher state herd premiums may be an inducement to other breeds for holding national shows at the Pennsylvania All-American, an open international event.

McCulloch announced also an offer of $225 from the Brown Swiss Cattle Breeders, Beloit, Wis, as special premium money to be divided equally among state or provincial herd entries in that breed.

Top group category in the All-American, the state or provincial herd class, consists of eight animals — one bull, any age; 2 females, any age; 2 females, two years or older, and 3 females, under 2 years. They must be owned by at least three exhibitors whose farms are located within the state from which they are entered.

Dairy farmers in the United States and Canada may enter purebred Milking Shorthorn, Jersey, Holstein, Guernsey, Brown Swiss and Ayrshire. Show sponsors are the Pennsylvania Department of Agriculture, its Farm Show Commission and the dairy association. Entries close August 15.

Dairy Scientist Values Mature Equivalent Data

The accuracy of comparing milk production from cows of different ages can be improved by analyzing the records of the Dairy Herd Improvement Association (DHIA), a U.S. Department of Agriculture scientist reported recently.

Dr Ben McDaniel, dairy cattle geneticist of USDA's Agricultural Research Service, said that to keep age differences from confusing DHIA records, yearly milk and butterfat production of all cows has been statistically standardized at a so-called "mature-equivalent" This represents the estimated production of a cow about 6 to 8 years old.

Mature-equivalent production records are an important tool for evaluating the genetic capacity of young bulls to upgrade a herd, McDaniel said at the annual meeting of the American Dairy Science Association in Corvallis, Ore.

A bull is evaluated by checking the record of his daughters against that of other cows in the same herd This usually means comparing cows of various ages. To correct this variation, age correction factors were developed in 1954 and refined after several years' accumulation of data.

McDaniel said that errors in calculating mature-equivalent production may also be caused by the change in seasons, the differences between regions, and the independent variation of milk and butterfat production.

A long-suspected seasonal difference in the adjustment necessary for a heifer to arrive at her mature equivalent was proved statistically by McDaniel He found that heifers freshening in summer required less correction than cows first starting to produce milk in winter

Regional variations also cause errors in currently used correction factors because production differences between some areas are greater for mature cows than for 2-year-olds.

McDaniel added that a cow's fat production rises more slowly from year to year than her milk production, causing errors in mature-equivalents because both production rates have been adjusted with the same ratios Future calculations will be done with separate ratios. McDaniel believes that his new findings can be programmed into the DHIA computer by autumn

It is better to ask some of the questions than to know all the answers—James Thurber

It took Washington and the members of the Constitutional Convention 96 days to frame the Constitution.

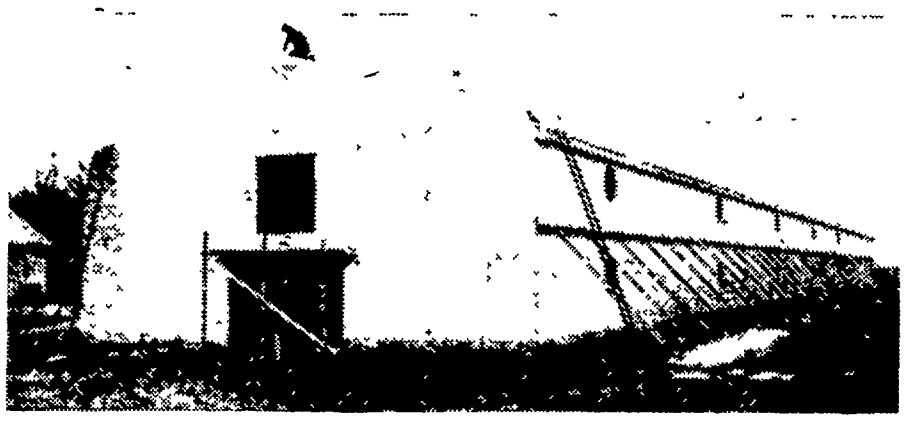
The Family Farm Looks At Broiler Growing



New controlled environment broiler house during construction stage — Farm of Richard Baker, Columbia, Pa.

Carroll Rohrbaugh and family new 30,000 bird house at Glen Rock, Pa.

Today many farm families are building NEW BROILER HOUSES.

Some of the reasons are:

1. ADDITIONAL INCOME (FOR THEIR FARM OPERATION)
2. A LARGER OPERATION (WITHOUT ADDITIONAL ACREAGE)
3. A BUSINESS FOR THEIR CHILDREN
4. EMPLOYMENT FOR THE WIFE (AT HOME)
5. EXCELLENT WORKING CONDITIONS
6. GOOD RETURN ON THEIR INVESTMENT
7. A SOUND AND GROWING INDUSTRY
8. TO BUILD EQUITY (FOR THE FUTURE)

WOULD BROILER GROWING BE GOOD FOR YOUR FAMILY?

WHY NOT GET THE FACTS FROM D. E. HORN & CO. (NO OBLIGATION OF COURSE)

CALL TODAY FOR AN APPOINTMENT WITH ONE OF OUR BROILER SPECIALISTS.
